

Playing Destinos Clips with Video Player

- < Be sure you are seated at a station that is connected to a videodisc player and that the station is powered on. If the screen is blank (cursor in top left corner) press a key to activate the display.
- < From the blue lab menu screen, select F2 (Class Viewing Assignments).
- < Answer “N” to the question about Russian.
- < The Video Player program will start. If you are not already familiar with the use of a trackball, read the instructions, then click the Ok button.
- < The Video Viewer menu appears in the top left corner of the screen. Click Source | Clips from File.
- < The Select a Player Control File dialog appears. In the lower area, select (double click) the Spanish subfolder of C:\PLAY\. Then, in the upper area, select the “Destinos” player control file and click Ok.
- < Select the desired clip from the list of clips in this control file (you may need to scroll down) and click Ok.
- < When prompted, insert the videodisc in the player and click Ok. The program will ask you to confirm that you have the correct videodisc and side. Make sure the lesson title on the image shown matches the description; the description can also serve as a check that you selected the correct lesson.
- < The video window opens at the beginning of your clip. A control window appears in the top right corner of the screen.
 - < Use the Play/Pause button to start or pause the video.
 - < Use the Recap button to skip back about 2.5 seconds.
 - < Use the Restart button to jump to the beginning of the clip.
 - < Use the scroll bar to jump back or ahead in the clip. Clicking the arrows gives a short jump; clicking the bar between the button and the arrows gives a longer jump. You can also drag the button.
- < The following menu selections are available while playing a clip:
 - < Display | Index toggles the frame number display on or off.
 - < Display | Transcript shows or clears the transcription window. (Since there are no transcriptions for the Destinos lessons, this option is unavailable.)
 - < New Clip | File List shows a list of clips in the current file. The New Clip menu also allows you to go directly to the preceding or following clip in the file.
- < You can move and minimize the picture, Video Viewer and Control windows. You can resize the picture window.
- < When you are through with the program, click Exit and follow the instructions for removing the videodisc. Please put the disc away and leave the workstation neat.
